

# “Proven, powerfull & scalable”

**Hultafors Group is a Swedish company with operations worldwide. In Europe alone, over 1,000 sales orders are shipped per day from three central warehouses – all using Bitlog WMS. When the Hultafors Group central warehouse in Holland moved to Poland in 2013, a handheld computer solution was introduced – a measure that has streamlined warehouse and logistics functions further.**

“We implemented Bitlog WMS on our three European central warehouses in 2011”, says Mårten Larsson, CIO at Hultafors Group. “The real test of strength for the system, however, came in 2013 when the warehouse and distribution operations in Holland relocated to Poland.”

“Crucial to the decision of implementing Bitlog WMS was the possibility to build further on the existing ERP and distribution system, and also the smooth integration with iScala Storefront. In other words, we did not have to re-invent the wheel.”

“An entirely new situation soon arose when Hultafors Group decided to move its central warehouse from Holland to Poland. The warehouse operations was planned to be outsourced and the choice stood between maintaining (and expanding) our own warehouse/logistic system or also outsource this on contract. The positive experience of Bitlog WMS proved decisive, and when the move was carried out in 2013 the system was already in place – now supplemented with a mobile solution. The launch took place in June 2013, and despite initial problems, deliveries could be carried out from day one after the move to Poland. In September of the same year we reached full functionality, and further development of the system is planned to continue in 2014.”

“Throughout this journey Bitlog has demonstrated solid expertise, great flexibility and distinctive service orientation. The good cooperation so far gives great confidence for the future.”

## HULTAFORS GROUP

Hultafors Group AB has its roots in the tool manufacturer Hultafors which began producing rulers as early as 1883. Today, the company consists of three product areas: workwear (Snickers Workwear), hand tools (Hultafors) and ladders/scaffolding (Wibe Ladders). Through its various brands Hultafors Group is represented in 37 countries and has over 11,000 point of sales. The company group has 620 employees and an annual turnover of approx. 135M EUR.

Hultafors Group has implemented Bitlog WMS Standard together with the optional E-commerce Accelerator, Retail Accelerator and WMS Advanced.
